DATABASE ON OLYMPIC GAMES SYSTEM

IDEA:

Our DBMS project is based on recording Olympic player's data and related information.Our database will contain all the necessary information of sports oraganised in olympics and performance of player.

MOTIVE:

Our main motive is that we need an organized and systematic solution for stored information where complex data can be easily retrieved and modified to provide exact information to users.

DESCRIPTION:

Our database will contain country name,country id,first and last name of player,his/her date of birth,gender,category of sports,in which year the olypic games was organised,various events ,medals and many more.

We will perform certain queries like:

- Best performer of various sports.

- Total number of bronze, silver, gold won by a specific country in different year.
